

Best Practice for Outstanding Wash Results

1 Before Washing

Always wash and dry hands thoroughly before and after each job.

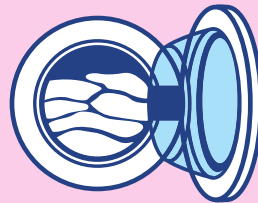

Wear protective clothing. Sort the dirty laundry by colour, soil level and type of fabric. Place foul and infected laundry into the colour coded bag.

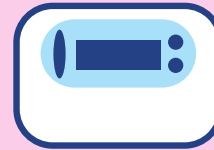

Check if there is enough product in the containers.

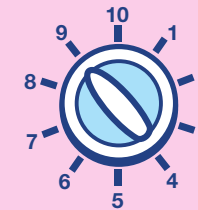

2 Washing

Never overload the machine.

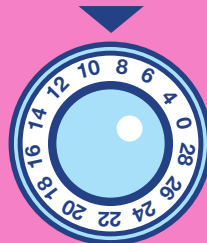

Select the right number on the touch pad using the programme chart.

Select the right wash programme on the washing machine according to the load type and temperature required.

3 After Washing

To dry washed fabrics, place items into dryer and select the correct drying temperature and time.

After drying, remove items from the dryer and iron whilst slightly damp.

Put washed laundry in a clean dry place away from the dirty laundry.

every experience counts.™
