HOW TO REPLACE A CONTAINER

1

Use the personal protective equipment which is specified by your employer.

2

Set the full container in place next to the empty container.

3

Remove the cap and tube from empty container.

4

Transfer cap and tube to full container. Screw cap on securely.

5

Never mix or add water to products.

6

Clean any spills immediately and rinse with water.

7

Wash and dry hands thoroughly after use.

8

Only use P&G Professional System products. Store products at room temperature.
